Meezan Bank  
The Premier Islamic Bank

This **Sales CRM Application** includes a mobile application for field sales with GPS tracking and a web application for managers to monitor and report. The goal is to improve sales efficiency, cost optimization, and decision-making for UBL users.

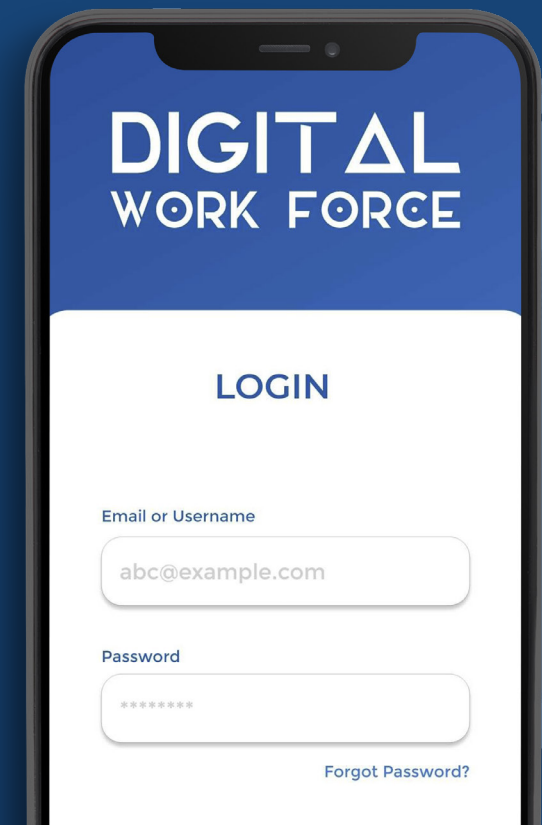

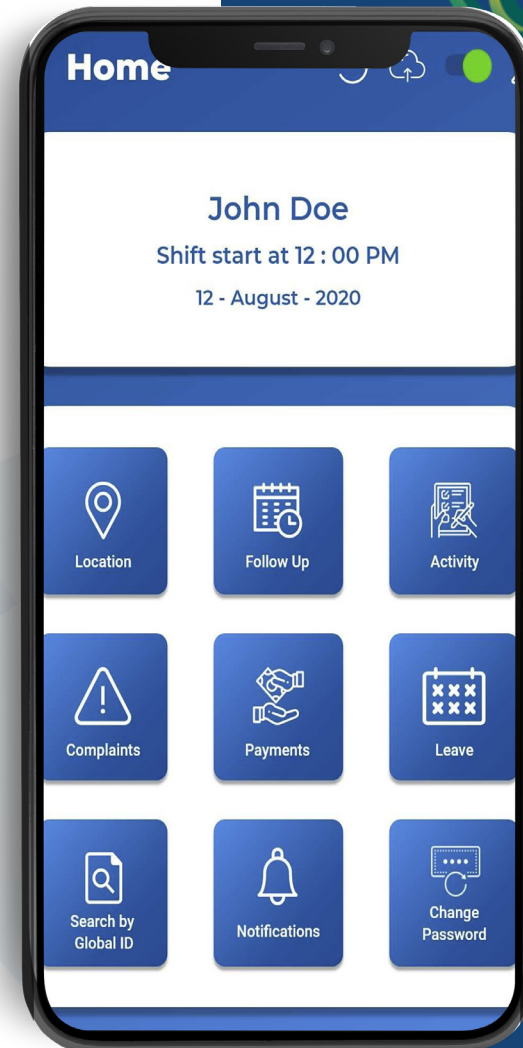

**Sales Force Application** designed exclusively for the Financial sector to empower their sales force with digital tools, native calculators, real-time customer & portfolio management like Ride-hailing Apps, and most importantly integrating them with core banking/financial solutions to have real-time updates in a secure environment.

**Al Meezan**  
Investments Management Ltd.

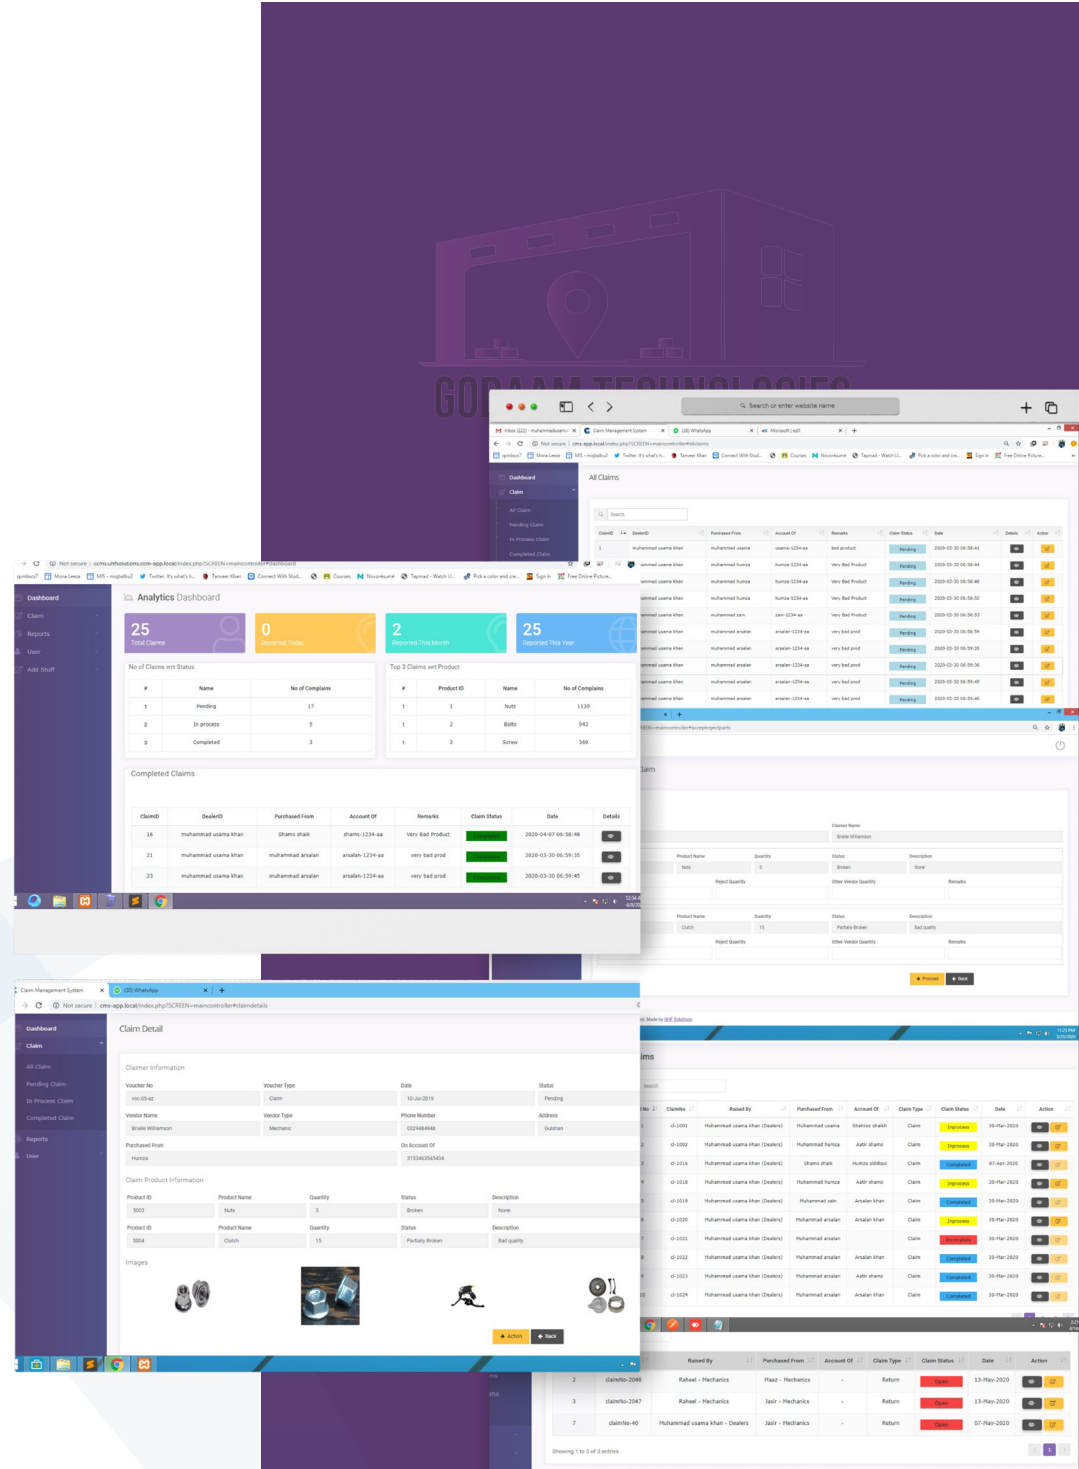

Sales Force Application designed exclusively for the Financial sector to empower their sales force with digital tools, native calculators, real-time customer & portfolio management like Ride-hailing Apps, and most importantly integrating them with core banking/financial solutions to have real-time updates in a secure environment.

Sales Force Application designed exclusively for the Financial sector to empower their sales force with digital tools, native calculators, real-time customer & portfolio management like Ride-hailing Apps, and most importantly integrating them with core banking/financial solutions to have real-time updates in a secure environment.

A mobile application based solution to provide **automation and digitization** in the Warehousing Sector, Vendor onboarding, and warehouse booking. The solution specializes in digitizing the entire spectrum of commercial warehousing and micro-space management making it convenient for customers to book spaces and manage inventory.

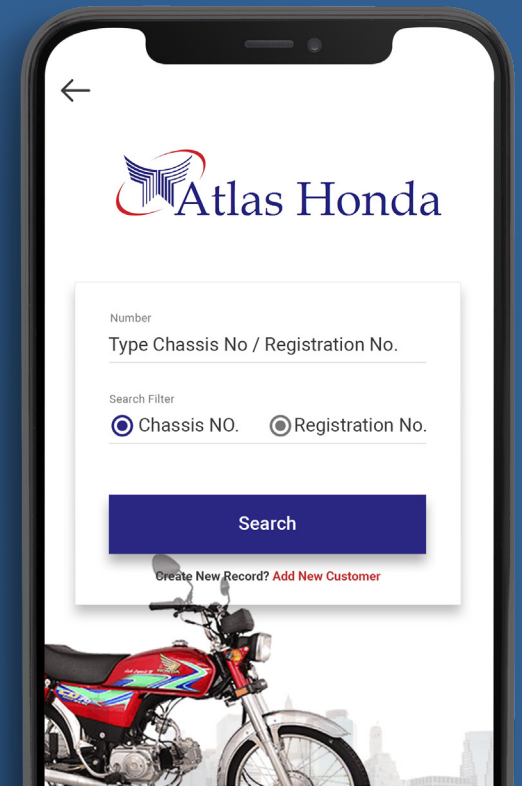

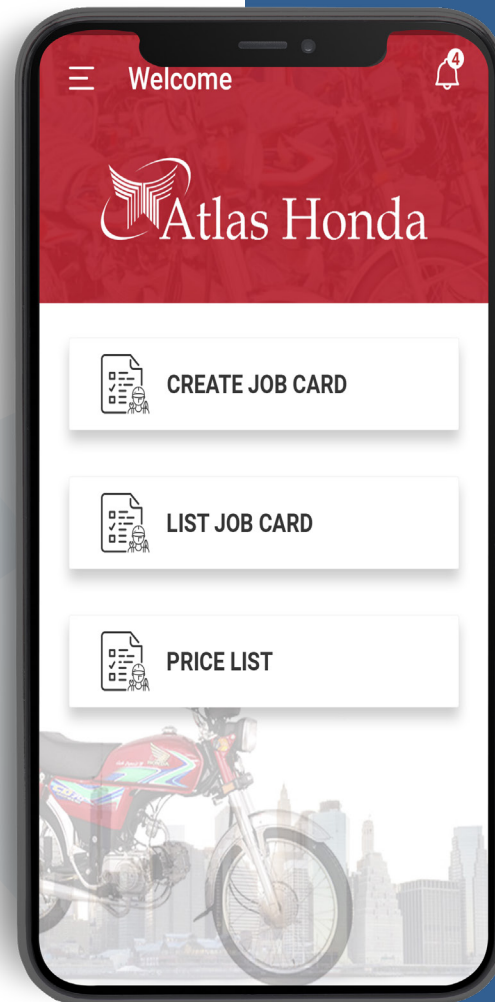

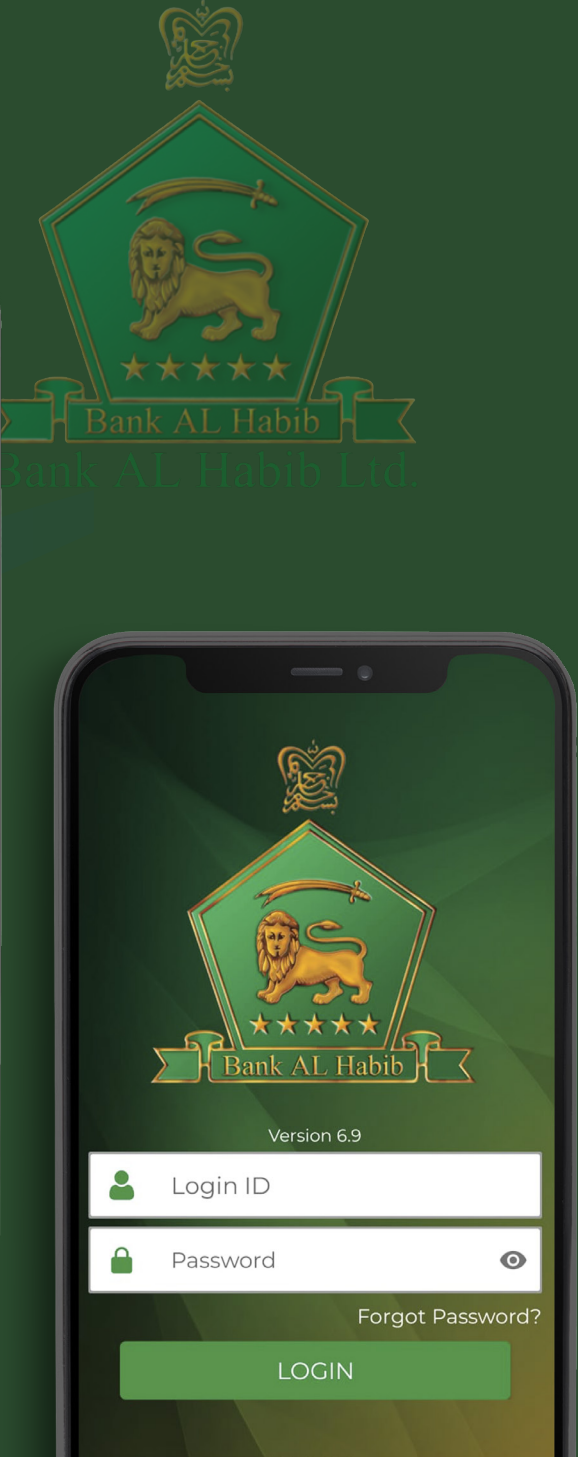

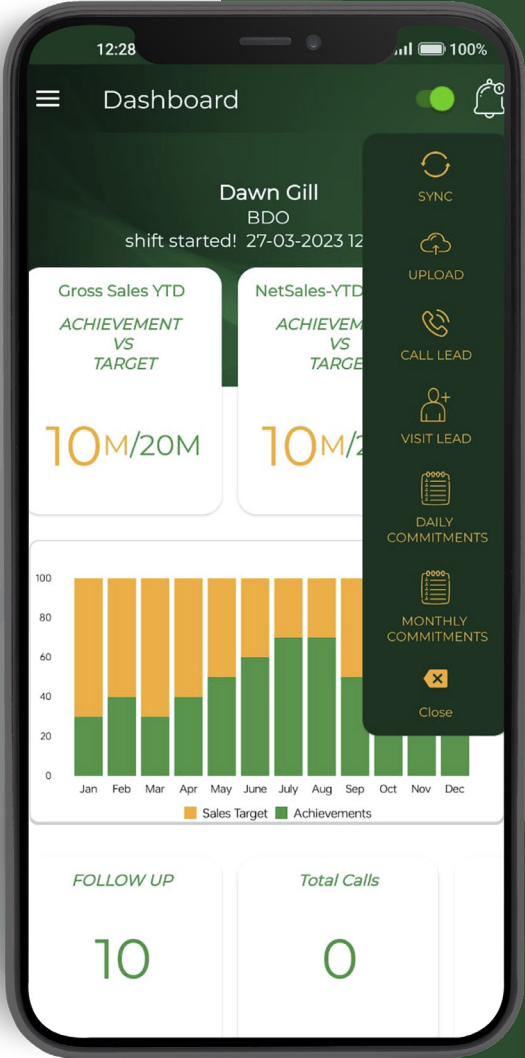

Atlas Honda

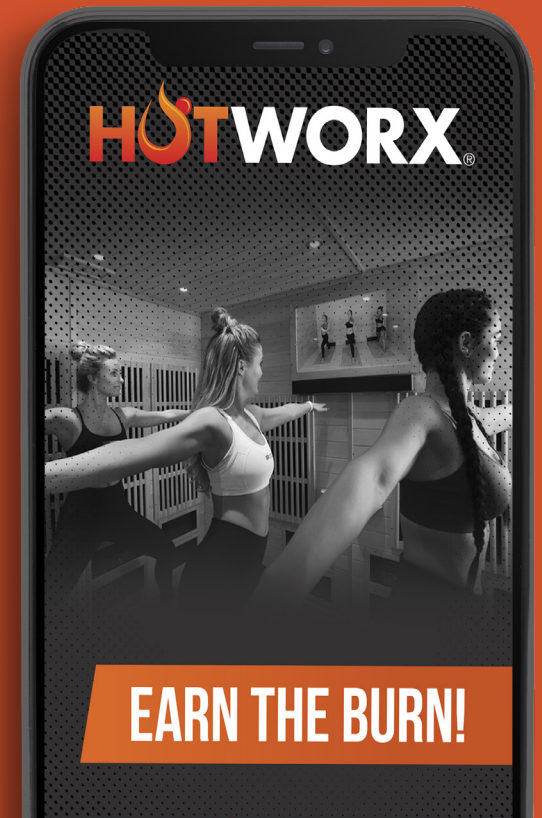

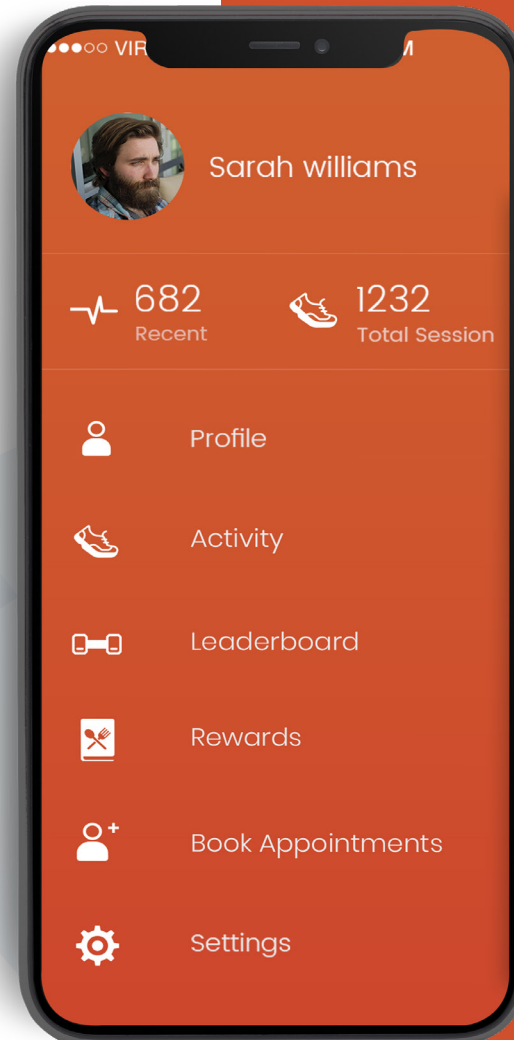

**Service Income Management System** app serves to gather the personal data of the dealership owner and the employees, along with the sale purchase of inventory/stocks/parts.

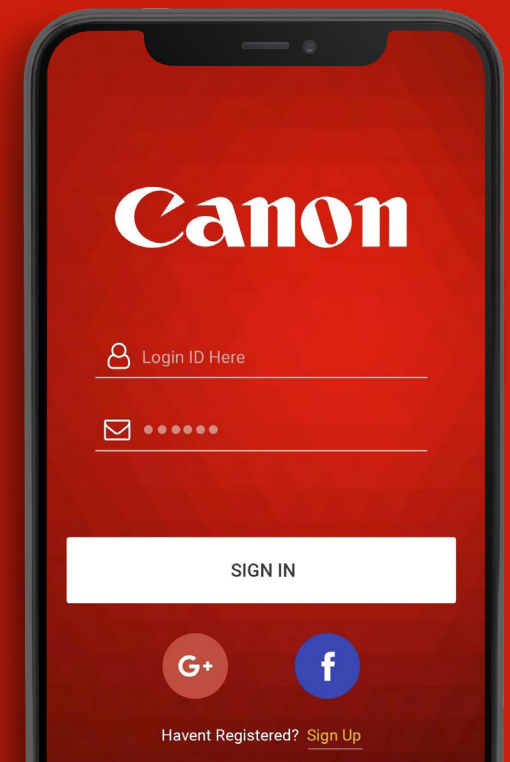

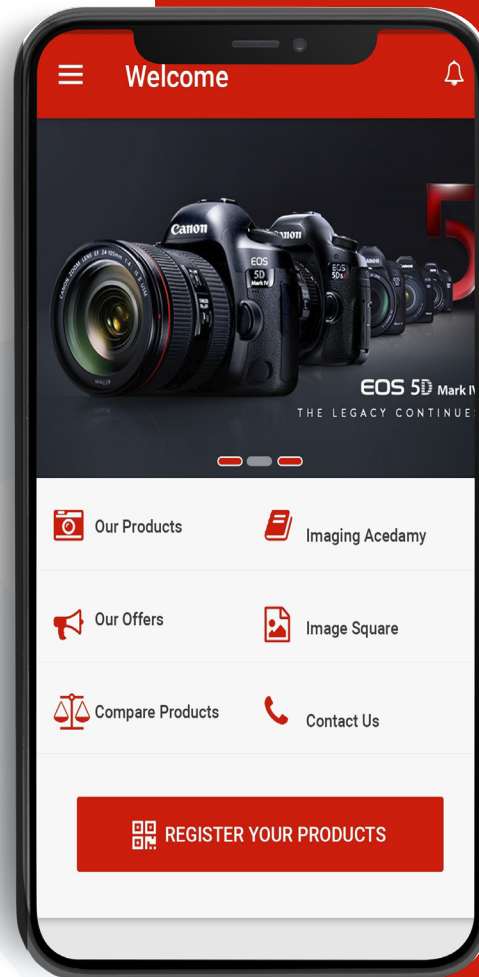

**Sales System CRM** includes a mobile application for field sales with GPS tracking and a web application for managers to monitor progress and reports. The goal is to improve sales efficiency, cost optimization, and decision-making for Al-Habib's users.

A Mobile application on both platforms for **fitness gym trainers** that helps them record their training sessions integrated with i-watch & Fit-Bit gadgets. The App is used by Planet Beach which operates one of the largest gym chains in the USA

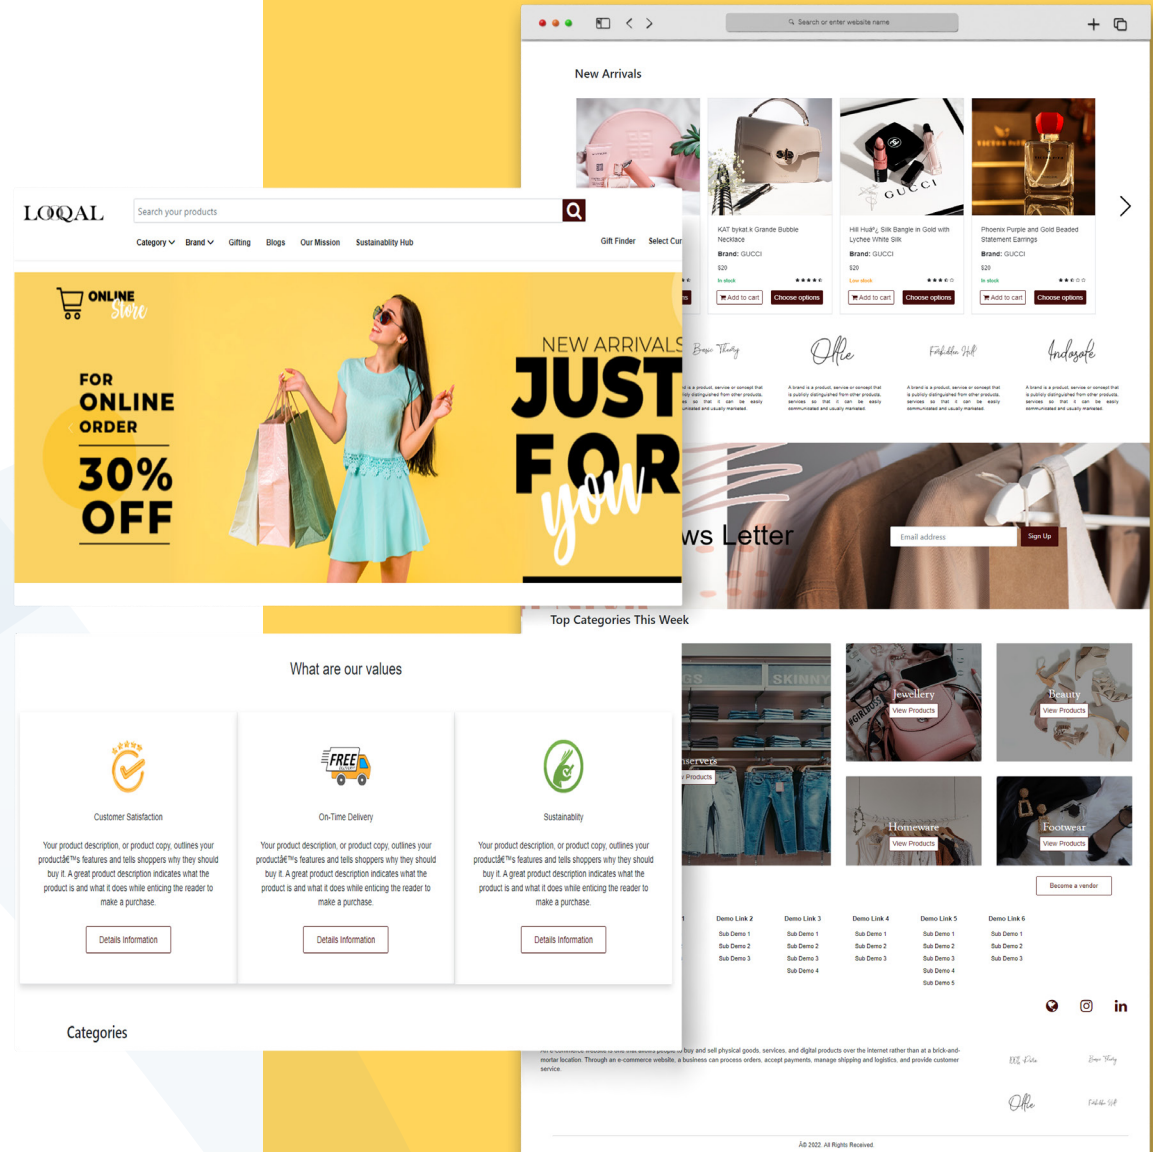

This **Product Traceability App** is backed by a web admin panel to help Canon Pakistan in customer registration through the mobile app. The admin panel helps generate unique code for each product which can be printed on labels and scanned through the app to verify the authenticity of the product.

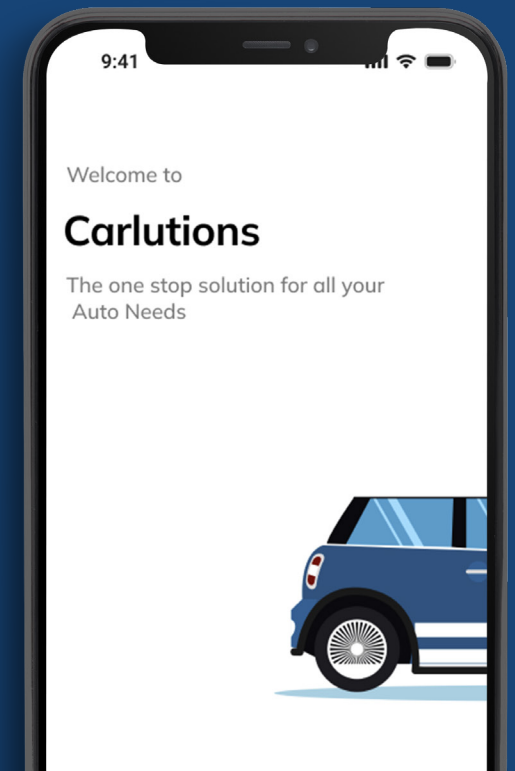

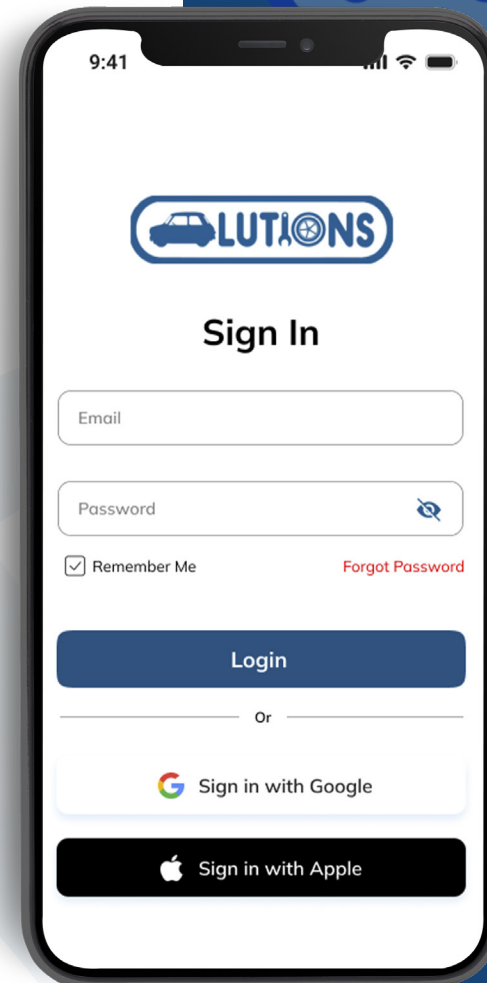

Canon

The project's scope involves the design, development, and ongoing maintenance of a **Multi-Vendor E-commerce Platform** operating on a B2C model. The platform functions as a marketplace for both buyers and sellers with a user-friendly interface and will be used as a platform for the two parties to connect.

# LOOQAL

The project's scope is to create a **Multi-User Mobile Application** tailored for Car Brokers, Dealers, and Consumers across the United States with a comprehensive Web Application/portal to manage back-end functionalities and operations.
